### EDGESTONE

### NOTE: Products designated as “Custom Order Only” are not in our inventory and are therefore, made per order.
Aqua-BriC Type 1 with Armorloc is specially designed for rapid removal of stormwater. Minimal openings make walking more comfortable while allowing for natural stormwater drainage and groundwater recharge. Retention ponds are eliminated. Maximum strength for driveways, parking lots and roads with key ecological benefits, curb appeal and convenient access for maintenance. Available from The Crusader and Renaissance Collections.

Pavingstones are laid out in a variety of patterns with gravel between them. Below the pavers typically sits a 12 in. to 24 in. sub-base of stones (depth requirements vary), a 4 in. deep base of 1/4 in. to 1/2 in. clean gravel, and a 2 in. bedding sand of 1/8 in. to 1/2 in. grits (see diagram).
